

The Hon'ble Secretary General,
United Nations Organization.

BULLETIN NO.5

Ref. No. AUM/Econ+: 525

Dated 10th April, 2011

Sir,

SEEKING A TRANCENDENTAL APPROACH FOR SOLUTION TOWARDS:

1. GETTING GRIPS TO REVIVE THE DOWN-TRODDEN **GLOBAL ECONOMY**.
2. NATURAL ENVIRONMENTAL SYSTEM RESET (NESR).
3. LONG-TERM RESPITE FROM NATURAL DISASTERS.
4. CONDITIONAL - APPROACH FOR TRIGERRING THE NEWER ONSET.

REVIVING WORLD ECONOMY TO END GLOBAL CRISES

It is extremely essential to value the importance of ' Human-Performance ' which directly correlates with the ' ECONOMY instrument ', as a key factor towards all subsistence upon our planet. Today's widespread recession of both such vital parameters has uprooted the basic foundation of happiness, as experienced by several countries during the recent past; while others remain struggling to maintain their balance. Mere injecting funds into markets /financial institutions are analogous to taking money from one pocket and placing it into the other; only rendering a transitory relief, apparently. The prevailing lifeless existence thrust upon the Global Public must be hastened to an end by opening a new dawn towards a more purposeful reality in our living conditions.

One has to understand that money does not breed from printing-machines or bank lockers but depends upon Human-Performance in the form of ' Energy '.

It is important to first understand the basic origin of this substance termed as **Energy**, which is essentially required for every aspect in regard to the entire existence of life and material in the world.

Nature /Creator of this planet has broadly constituted a '4-phased' phenomena contained in a cycle, as quoted in ancient scriptures and has also

been confirmed by past history record. The clockwise-rotating programmed cosmic cycle/Disc of ours comprises of: Excellent, Good, Fair & undesirable, as (1,2,3 &4). The four variables of

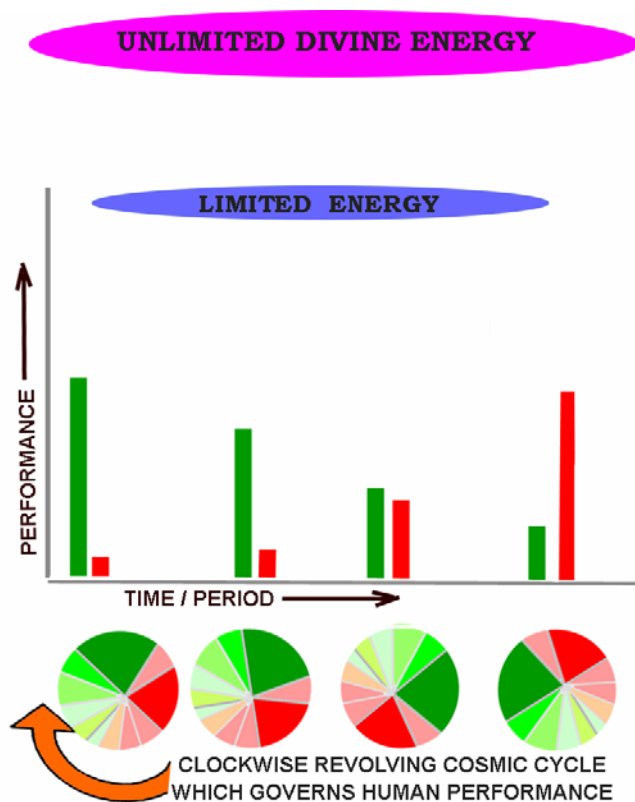

Energy-format are bound into a time-cycle/ period, whichever segment faces upward, as No.1 in the facing illustration; dominates our earthly existence. God/Creator is

formless but his emanation is an unimaginable & extremely gigantic amount of Energy. These four uneven segments/ phases constitute our periodic cosmic-cycle. God can use his output Energy to create everything & anything that is required. As seen in **Magenta**; is the referred unlimited Energy. An extremely minute portion of his energy/psyche could be seen in **Blue** as a source of ' Limited Energy ' which he imparts upon us for our worldly existence, that gets polluted with time. This 'Blue' has been depleted & contaminated today and it is **not** being supplemented by the Magenta anymore.

The cosmic cycle governs Human-Performance at a particular time /period, as shown. The current period under progress in respect to our planet today; is the 4th phase (*Kali-yuga*) as seen on the extreme right with a tall red-bar. Whereas, the first phase, as on the extreme left is the most ideal one wherein extreme goodness prevails; resulting a tall green bar of richness in everything. The greenish and the pinkish portions are the remaining two periodic-cycle's phases which contain a blend of both features. Taller the red bar, more is the misery upon the occupants of our planet: ruined-economics, evil, inefficiency, discontentment, diseases, calamities, floods, droughts and everything pertaining to adverseness would prevail over our worldly life, affairs & existence, no matter what you do!

Whereas in 1st phase (*Satya yuga*), when the green segment is controlling; there is added supplement of renewed energy into the 'Blue' by the 'Magenta': resulting in bountiful of everything that is desirable for our entire planetary existence. 2nd & 3rd phases do receive lower-residual inputs of from the Supreme source.

As per the scriptures, each phase may take several thousands of years to change, but, yet; the Creator has cleverly inbuilt a provision by which he alone can end an

existing phase overnight also, even for the sake of one odd-individual: As in scriptures /history, when it was decided by god; he re-sequenced the periods: as 1,3,2,4 instead of 1,2,3,4 to meet a universal requirement. It is not true that god desireth to also create the unpleasant 4th phase, but; the circumstances so demands due to the negative performance of a certain large group of humans in phases 1,2 &3 wherein their Negativity does not get much opportunity to express itself due prevalence of a superior lifestyle.

Hence the negative fragments during the good periods accumulate, regroup and ultimately sprout-up collectively to govern their dominance in the 4th period. Thereafter, it solely depends upon the residents of the planet whether to rebel/ crusade against the prevailing evil or bear it as passive onlookers. An improved struggle made by crusaders could bring an early end to the existing awful 4th segment's impasse i.e. it is the determination and sacrifices put up against evil by the masses, which matters. Today, we need to decide whether or not to pledge ourselves in a great effort to end the 4th phased-portion containing misery.

Whatsoever is the quantum of Energy contained in the Blue is only made available to our planet's occupants, as seen, feeding the governor: which results in a directly proportional output upwards to cause the green & red bars: resulting Human-Performance. The left illustration is today's scenario with red prevailing, but; obtaining no input from the Supreme/ magenta.

Worldwide unrest amongst so many countries observed these days is due to our growing ignorance in regard to Truth and optimum application of spiritual-science, resulting: extensive discontentment in every direction. Human, by its own inbuilt-characteristic wants to seek higher joy, but; without further influx of Divine Energy it has now become impossible even to get the basic ECONOMICS set right to meet the outgrowing demand of each individual besides the various other necessities which are well needed as joy/comfort oriented substances; either in material or immaterial form.

The most important aspect to accept is; the Creator/God is that source out of whom [Truthfulness+Righteousness] emanates in the form of an Energy which is the fundamental basis of: power supply source to every type of existence in the entire

huge cosmos. And, it is also universally accepted that we can only approach the Creator/Truth/God if our conduct in life is truthful & righteous, or at least; we are willing to embrace such virtuous lifestyles. It has become extremely pertinent that the Creator be convinced to intervene and use His powers to turn the periodic cycle at this juncture, further stagnation of the present situation would only harvest more misery. Choice is yours?

2. NATURAL ENVIRONMENTAL SYSTEM RESET (NESR).

As already presented in an earlier bulletin, by obtaining a successful NESR operation; the entire planet's natural content can get restored. All the Creator needs to do is to replenish Earth with its natural resources as once prevailed before we messed it up. By accomplishment of such a graceful process; the dissolved CO₂ and other undesirable polluting gases in our environment would be ousted; thereby eliminating Global warming & associated effects upon Earth.

Moreover, the NESR technique of Nature will also make our soil yield better crop & minerals, the trees would bear more fruits. There would be no need for adding of fertilizers & chemicals to get good crops. The cows would deliver more milk, there would be cleaner water flowing in the rivers, everything that is useful and desirable would be available in abundance. This is all possible with the Creator's Graceful Energy. He can alone deploy the various divine machines. Black-holes are vicious psychic machines deployed to draw energy out of matter of any enormity whereas Worm-holes are used to transfer energy from one location to another; to also maintain its current form. Such devices can take colossal forms or be extremely microscopic /invisible at all; can be made available anywhere.

The 'Accretion-Disc' (***Sudarshana-chakra***), as shown, is a multi-purpose spinning-tool/spindle which can separate various elements in our polluted environment, it can also illumine objects where there is total darkness and has numerous other applications. This is amongst one of the several Divine machineries; once the substances are separated, worm-hole technique can be simultaneously deployed to oust the undesirable substance deep into space.

For such extraordinary NESR operations upon our planet we need to approach the Creator who is nothing but an embodiment of Truth & Righteousness, consequently; to be eligible to reach the Creator one must possess that much of Truthful+Righteous content, in every aspect of life.

All these quoted machines have been observed silently working in deep space, as confirmed by scientists & Astrophysicists with no information about their operator. Whatever exists out in the universe/cosmos can also be seen contained in a microscopic-form deep within each individual, but; with a spiritual vision.

3. LONG-TERM RESPITE FROM NATURAL DISASTERS.

With due respect to our learned seismologists /scientists it may be said that tectonic ' plates ' exist in the earth's inner-layers and such plates' **shift** triggers earthquakes & Tsunamis. But, why do these plates shift and who shifts them? Indeed; only the effect of such undesirable shift gets noticed by its devastating effects, but; source of the cause of such plates' shift remains hidden.

The power of God can fill those gaps between such ' plates ' with such Energy also referred to as dark matter by modern scientists and prevent any scope for such assumed shifts. The entire universe is constituted out of mere Energy emanated out of a single point, as agreed by learned scientists. Similarly undesirable floods, wild Fires, drought and numerous undesirable occurrences can be thwarted away by using Divine grace & techniques. It is highly unjustified to simply term the resultant effect of our ignorance, incompetence and foul-play: as ' natural-disasters '; only amounting to deceiving ourselves. Sanctification of rain at proper time could also be obtained by approaching a higher consciousness which is nothing else: but a higher sonata, resulting out of principles of Truth+Righteousness (*Satya +Dharma*).

4. TRIGERRING THE ONSET TOWARDS A NEW ERA.

Enough emphasis has been indicated by my past bulletins in regard to approaching God for intercession into our planet's awful state. Indeed, there exist numerous highly revered saints & sages in our world who are highly placed in the level of consciousness; if they could even collectively have God to help us out with his machinery and restore our lost joy: much would be achieved. Gaining enlightenment or obtaining salvation and then saying "good bye" has become an outdated practice now. God wants such revered citizenry to work along in the mainstream of our society and exhibit the Wonders of Nature by virtue of appropriate application of allied wisdom. There are three options to end the present crises i.e. to have God to expedite the turning of the cosmic cycle:

1. During the recent Cricket world-cup it was observed that millions were desperately praying for India to win and it so happened. Similarly, if the entire world offers a combined prayer together; maybe it works. Try?
2. Anyone can get close to God; I too have been able to gain a close proximity to God and have sought his grace to help the various residents in our DEAD planet but the conditional help which God is offering needs: the extremely imperative pending issues of mine be resolved first, as principles of Truth+Righteousness is being terribly suppressed, as in **ANNEXURE 5A**.
3. The last option is to remain hopeless & stagnated; wait for misery to intensify to higher levels where you have no option left but to look towards God for bail out.

But, if God evaluates to find no scope or reason for a revival due prevailing obstinacy; he may decide to extinguish the planet where he can deploy a Black-hole, as shown, to suck our entire galaxy into extinction within seconds. A frequently occurring of such extinction phenomenon has also been confirmed by scientists engaged in deep space explorations. The Creator has created billions of such galaxies; he has a lot of good purpose behind his creation and remains concerned.

Capt. P.N.Sharma. 3226/21-D, Chandigarh, India. (M): +91 9815002322

Kindly arrange to accord a widespread dissemination of this article worldwide for the masses to decide the planet's future. Anyone interested in previous bulletins could have the same. This elite wisdom is not available elsewhere; in such a simple format.
