

Indians are now desperately looking ahead for better/ Joyous days. Our Hon'ble Prime Minister had properly made an assertion that "**achhae din aanae wala hain**" (Good days/ times are going to come). The large public mandate has already confirmed the arrival of Good-days for India by electing a new government. In fact, Indians should now be looking forward to "**Khushion bhare din**" (Joyous Days to arrive). The public expects the new administration to work with a rejuvenated spirit of determination to set things right & bring widespread relief for the tormented Public in respect to every aspect towards a resourceful country. Critics are most welcome in any fair-society under democratic rule as they keep reminding the governance about their commitments, lapses & other important needs for Public welfare.

But, the meaning of "Good Times" must be well understood. If one looks at the illustration about our country's performance

one would observe that there was a steady decline in the quality of Governance, shown by the line dipping continuously from B to C, thereafter to D — remaining below the base line, during the period of past 'Bad-Times'. This was a period (B-C-D) when evil had its good days, the negative ones enjoyed a nice time with a safe haven and were never accountable for their miss-deeds — they thrived at public cost. Whereas, the weak / truth abiding simple-folks toiled & suffered to remain reeling under a low profile bearing pain and agony due to the dominating effect of foul & inefficient governance.

Today the situation has changed; the unrighteous will not be able to continue with their — those merry-days, as; for them the other days would 'gradually' set-in to make them pay for their misdeeds and instead also help

them undergo necessary 'corrective training' so that they too could be uplifted to enjoy the merits of 'Real Good days' contained within an ideal society. This is a process of evolution designed by Nature as described in the " Corrective Training" POST at www.divinekripa.in Whereas, the ones who had worked with the correct spirit of Truth & Righteousness with respect to their duties & responsibilities during past 'Bad-Times' will now start getting blessed automatically. Indeed the amount of blessings as a result of such Good period now would be directly proportional to one's past performance. Although the curve has now risen above the base line upto about F (shown) but much more collective good effort need be contributed to push it further up to such a point from where Nature's blessings could be availed easily, in plenty. That is the much awaited time to witness which would result with requisite Joys. Work sincerely and have faith in God — that Real-time Joyous experience has to get established as there is no other alternate way for the curve to travel now onward; it can only travel upward ... as explained in Bulletin No. 8 'Transformation Update', [in the service section of the site.](#)

It is very much emphasized that a person only has authority over one's performance pertaining to 'Quality & Quantity' of her/his work-output: this is the only piece of regulator available at our disposal in regard to our 'authority to decide & react about'. This aspect is the crux of the basic foundation laid down for human-beings as guidelines contained within the domain of human Philosophy. Knowledge & Wisdom are the most purposeful tools made available for us by Nature; its 'positive' & purposeful applications are conclusively & extremely vital for the welfare and interest of humankind.

Normally, one works to seek & obtain results as desired but when the same do not crop up; misery descends upon the agitated mind. This aspect has to be controlled. Such person must realize that the intellect of our human-system is very much limited to foresee. We do not know what is good for us at this moment and what is going to happen at the next moment in respect

to the outcome of our work. Yet, indubitably whenever work is Performed with the right spirit it will always yield good result but — at the right time, as an unnoticeable integrated performance of nature which is designed for our welfare keeping in mind various aspects as mother-nature can predict various cosmic changes and accordingly decide better. Nature is exceptionally fair with its process of bestowing reward & destiny upon every single human-being wheresoever one may be located, as a 100% error-proof design. The more such a natural arrangement is accepted the lesser misery would creep-in even though there may be an apparent delay as estimated by our wavering-mind due to its limitations, as elaborated in Human Spiritual-science [HS-s] of the Service section at: <http://www.divinekripa.in> Just persuade the mind to control & have faith — the requisite time to have the right things materialized will arrive. Continue your work with sole objective to achieve the highest level of perfection which is possible within your reach.

Indeed in this New ERA, under process; the ones who enjoyed & prevailed during the Bad times with inefficient, foul & corrupt practices would experience the difference soon to realize the effect of their past miss-deeds and needed compulsion towards change in their work-style. We have all gone thru this drill life after life, erred & sinned time and again — both as good & bad deeds; we all have to change at some point in our multi life-cycle to grasp the meaning & requirement of our role & purpose in life. We have to first learn to perform righteously in accordance to Law & procedures established by us from time to time as a commitment to build a good society. Only after one undergoes the course of corrective training one would arrive at a better position to realize the difference between good & bad and what is expected from us instead of immediately start groping for Joyous days soon, as a miracle. [Miracles are possible, but it is better to have them occur by the approval of God and one must also be worthy enough for that?]

The good folks now need to accelerate their past good performance to help transcend towards higher levels of consciousness, as these good times setting-in would be highly conducive for a brighter widespread progress. It is only after continuous practice of such established values of life during these Good-times for a substantial period would enable one to experience the **Joyous-days** (*Khushion bhare din*) settle-in. There would be fulfillment & contentment towards every aspect of life so as to enjoy the bounties of nature within our worldly living, here on earth itself. Even Wonders (*Chamatkars*) can follow if Divine Grace could be more appropriately tapped.

We have all experienced the past evils of corrupt governance and its associated misery thrust upon the citizens of India. Today a new government has been elected by the public; give them time to first remove the past inertia of foul governance and thereafter render their commitments before the public towards meeting every promised obligation. The vital factor of 'Momentum' of past inefficient governance has to be first neutralized; only thereafter a change towards newer possibilities in future could be envisaged.

Also try to understand that the good-times' period as indicated in the [Transformation update bulletin](#) does not apply universally to every region on this planet, at the same time. Each country, section on Earth has its own period-cycle running-along, as shown. This destined cycle programming is highly intricate & varies from individual and /or to a

group of people too. Only a few period cycles are shown around Earth planet although numerous such time cycles are hovering around simultaneously; each with different orbital /positional effects that also behave under variable influence of numerous celestial objects in space. But, broadly appreciating: the collective consciousness /effort of Indian public has today lifted the period-cycle/ 'effective governance' of India into the region of 'Good Times'.

Going back to the first diagram, travel from A, B, C, to F & upward, and finally back to A, as a complete cycle; also contains an individual's destined effects as a result of one's deeds. The limit of upward travel is upto an individual to decide with regard to one's capability & desire i.e. as to at what stage would one like to give-up the pursuit for a higher Joy and instead decide merging back to one's origin-source from where she/he had initially arrived into this world, long back, intentionally. This is our nature's play where our little world along with the entire cosmos is a colossal playground.

The only means available before the public to derive an early relief at this particular period in India, is that the citizens must strive their very best by contributing requisite effort to enhance such good governance which respects principles & laws of Truth & righteousness. Moreover, God also demands from the Righteous ones to bring evil-doers to Justice; by this action an effervescence sets-in within the cosmic which is highly conducive to augment an early arrival of 'Joyous days' for all. The longer the erring ones are allowed to remain uncorrected, longer would the period of misery get extended. God has designed human life like this; the veracity of such gospel could be easily ascertained from the past great Epics of India (Ramayana/Mahabharata). Even mere presence of the erring ones uncorrected within our society is very unhealthy & 'disastrous' for the new set-up as it would otherwise amount to crediting of their evil /sins by the new Government who would else soon lose their acquired credibility, virtues and goodness and become a reason towards condemnation. God confirms & reaffirms very evidently & firmly that evil-doers must be exposed /corrected & the order of righteousness (*dharma*) be restored. This is why an established process of corrective training is incorporated in the manual made by the Creator for its creation; whether one likes it or not! Believes it or not!

The greatest achievement of Mr. Narendra Modi is that he had shown good progressive work even during the past appalling evil era — this was not an

easy task and this is a reason why such a majority has been bestowed upon him, by nature. Nature has already decided to unveil the true face of India gradually towards higher platforms and subsequently deliver her before the global public as best amongst world standards in every respect towards human capability & performance **and** also to 'Renew' our weary planet which has been bearing the brunt of our awful burden since a very long time. India has been chosen so as it dwells within the core amidst ancient civilizations which also has the influence of Spiritual Wisdom in her garb awaiting release of its precious Energy by a triggering mechanism, of God. Spiritual-science is similar to Nuclear-science; both have potential Energy which must never be misused. Unfortunately the former got misused in past and was made redundant long back; today it is time to recover that lost science to enable humankind elevate in order to breakaway from the present evil clutches of misery & stagnation — but under full coordination and harmony with Nature.

The Spiritual-awareness floating around the world today, especially in India, mainly contains 'peripheral-wisdom' in the form of information & knowledge about 'Spiritual-science' sufficient enough to take one towards salvation/redemption. Such commonly available wisdom is of lesser significance in respect to our prevailing misery & adversaries as the appalling times faced upon our planet and its residents has today already advanced far beyond normal human control. Much finer Wisdom & its allied Skill lies veiled within the core of such 'Exclusive-science' which contains requisite Energy, waiting to be unleashed in the most suitable manner to uplift humankind to higher realms of Life: containing Joy, hope, contentment and maybe also Wonders.

Today's demand has become such that the learned ones instead of the routine escape-route of liberation must rather meticulously, if possible; work more for this world to bring in greater Joys contained hidden within higher realms of nature i.e. to explore more about the possibilities in regard to applications pertaining to suitable deployment of latent energy to unveil the

'wonders of the Creator', let us not quit but instead aspire to experience everything available within this huge cosmos with the most earnest determination. What will you do after the great escape, has any traditional sage visionized the true redemption what I am hinting at? Instead of our such longing why not rather sacrifice our last breath towards bringing out heaven upon earth to show before the global public — the true meaning and practical applications of 'Dynamic- Divinity' veiled within, even just for once.

It is again reiterated that presently there is a large number of residents on earth who work with the true spirit of Righteousness/fair-play much needed for an ideal civilized society. They do desire to transcend and enjoy every higher work of nature but, yet; the opposing force today is strong enough to retard the appreciable effort expected from our combined progress in regard to quality of our 'collective consciousness'. This aspect of the pooled-human performance which has become degraded/stagnated/tardy within our country is posing itself as a major drawback/ threat to our 'collective progress' & has now become a great concern — as a disgusting enigma before the Creator.

REVIVAL OF MONSOON (2014)

One can be successful to unveil and get closer grips with the Rain-showering 'natural-tool' & its associated links, using ancient-science to suitably understand nature's inherent play towards triggering its mechanism and instantly recovering the bleak Monsoon in India. Failure of a proper Monsoon is a bad omen. The quality of monsoon's performance is directly proportional to the quality of collective human-consciousness with respect to a particular region on the planet. Every endeavour must be made not to neglect but rather avail this prosperous 'Natural-Resource'. It is very pertinent to emphasize that Monsoon does not only bring in Rain as water but also brings-down various important constituents upon the soil which helps augment the output of soil in every respect, much needed for suitable

extension of ideal human-living & the environmental system. In fact this is an easy indication for human senses to observe as a Divine-influx — as Precipitation in the form of 'Monsoon'. Indeed, such precious & purposeful sanctification contains nature's Divine-Energy along requisite precious substances that are invisible to our scientific-eye. Divine wisdom is needed to understand the wonder of nature's play in regard to such type of a sanction, upon earth. The prosperity of Nations much depends upon the Performance of an Optimized Monsoon in their respective regions. Merely assuming that it may get restored next year is a vague presumption made by the ignorant. An earlier article to this effect is available as Bulletin no.6 in the Service section at: www.divinekripa.in to understand how rain-clouds get formed and how needed monsoon system takes shape. Monsoon could also be programmed for any country /region to occur at the correct time with the right proportion needed to bless the soil & environment in respect to the 'Quality & Quantity' of nature's products* and also bring-in sanctified rain as a big relief for public from the Summer-heat — using 'Divine-intercessions'.

** soil products: crops, vegetables, fruits, herbs, chemicals, animals, poultry /live-stock, plantations, minerals, oil, environmental-forestry, eco-system, rivers, glaciers and several other useful ingredients available directly & indirectly within our 'mother-soil'. Prosperity & economy for any country depends upon the output from its soil and not alone from taxing public-earnings. Efficient governance must learn the art of obtaining enhanced production out of the soil i.e. how to **induce more** 'Energy' into the soil and extract **more** out of it; just as you sow a single grain into the soil and reap thousands of grains in return — this is titled as Performance.*

Our country can be Transformed and shaped into a new Resurgent India — a Great India using such Divine ENERGY which can also be suitably engaged to renew our worn-out planet; under the perfect synchronization, control and harmony with/ by the Creator to bring widespread contentment to every life.
